1. A method comprising:  
providing a three-dimensional computing environment;  
receiving a two-dimensional web page;  
converting the two-dimensional web page to a form useable in the three-dimensional  
5 computing environment; and  
presenting the three-dimensional computing environment with the converted web page  
contained therein to a user.
  2. A data processing system-readable medium having a plurality of instructions executable  
by a data processing system embodied therein, wherein said instructions when executed cause  
said data processing system to:  
provide a three-dimensional computing environment;  
5 receive a two-dimensional web page;  
convert the two-dimensional web page to a form useable in the three-dimensional  
computing environment; and  
present the three-dimensional computing environment with the converted web page  
contained therein to a user.
  3. A method comprising:

providing a three-dimensional computing environment;

receiving a two-dimensional application program;

converting the two-dimensional application program to a form useable in the three-

5 dimensional computing environment; and

presenting the three-dimensional computing environment with the converted application program contained therein to a user.

A1  
4. A data processing system-readable medium having a plurality of instructions executable by a data processing system embodied therein, wherein said instructions when executed cause said data processing system to:

provide a three-dimensional computing environment;

5 receive a two-dimensional application program;

convert the two-dimensional application program to a form useable in the three-dimensional computing environment; and

present the three-dimensional computing environment with the converted application program contained therein to a user.

5. A method comprising:

accessing a website;

automatically accessing a 3D environment server in response to the access to the website;

generating a 3D environment on the website; and

5 retaining information related to the website access in a repository.
